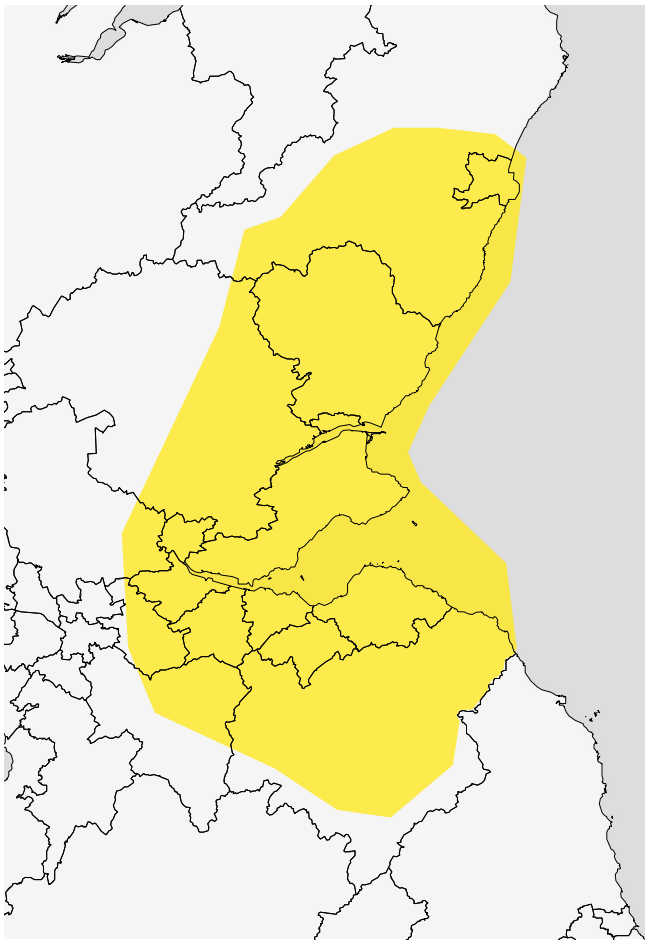
Yellow warning
Rain

Between
09:00 Tue 12 Dec 2023 and
03:00 Wed 13 Dec 2023



There is a small chance that persistent rainfall through Tuesday and into early Wednesday may lead to some flooding of roads and properties.

What to expect

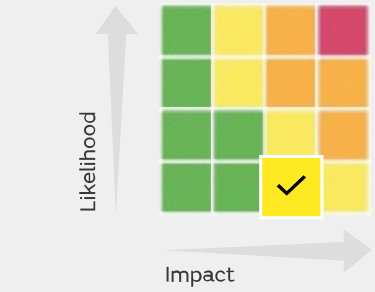
- There is a small chance that homes and businesses could be flooded, causing damage to some buildings
- Spray and flooding could lead to difficult driving conditions and some road closures
- Where flooding occurs, there is a slight chance of delays or cancellations to train and bus services
- There is a small chance of fast flowing or deep floodwater causing danger to life

Further details

An area of rain arriving from the west early on Tuesday is expected to become slow-moving and persistent across this region, most likely eventually clearing southeast in the early hours of Wednesday morning. Much of the warning area is expected to see 15-30 mm of rainfall during this time, and in some places, particularly east facing areas of higher ground, 50-75 mm is possible, which could lead to some flooding.

What should I do?

Check if your property could be at risk of flooding.



Very low likelihood of medium impacts

Further Details (continued)

If so, consider preparing a flood plan and an emergency flood kit.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
